PROJECTS

Alumni Network: Node JS, Express JS, React JS, MongoDB

A web development project with an engaging, supportive alumni network that is crucial to an institution/organization's success.

It allows the Alumni members to register themselves and update their details. It allows institutes to verify and authenticate their registered alumni and search details based on criteria such as year, trade, etc

Fine-tune bert for sentimental analysis:
In this we create a feedback analysis system using Large Language model(bert) to train the model on text review and analysis whether the review is positive, neutral or negative. We also create a web page for this.

ACHIEVEMENTS

Participated and won in Smart India Internal Hackathon 2022
